

To Whom It May Concern,

Gordon Ridge, asked me to write a brief letter of recommendation to which I whole heartedly responded. Gordon has one of the brightest and most doggedly determined technical minds of anyone I have had the privilege of knowing. His diligence to find and implement innovative approaches which yield the quickest render times while maintaining beautiful image quality has amazed me. Furthermore, his gentle friendly style fosters a great working environment.

Upon viewing his reel you will observe the quality of his work, what you won't be able to see is his willingness to go the extra mile under extreme deadlines to get the quality on the screen. This is the Gordon that I unquestioningly recommend.

He would be a real asset in any company.

Sincerely,

David Pitts
VP of Production
Wet Cement
